

# SUPPLIER CAPABILITY STATEMENT

## INFRASTRUCTURE & CONSTRUCTION MATERIAL SUPPLY

UAE • OMAN | CANADIAN-FOUNDED

One World Supply (OWS) is a Canadian-founded infrastructure and construction supply platform serving contractors, project managers, and government-authority projects across the UAE and Oman. Our structure combines over 20 years of construction execution and industrial manufacturing experience with a certified global supplier network allowing us to deliver compliant, specification-matched materials on project schedules, not just purchase order dates.

### TECHNICAL LEADERSHIP

Our president, Nicholas Salvatore P.Eng, is a licensed Professional Engineer who can validate materials against your project specification before procurement a standard most trading companies cannot offer. Our Vice-President, Claudio Del Santo, brings 25 years of industrial manufacturing experience with direct manufacturer relationships across Europe and Asia. Together, OWS leadership has delivered over 2,000 projects exceeding USD 380 million in combined value.

## CORE SUPPLY CATEGORIES & COMPLIANCE STANDARDS

### INFRASTRUCTURE MATERIALS

- Ductile iron (DI) pipes and fittings (EN545 / EN598 / ISO 2531)
- HDPE piping systems
- Water network valves
- Manhole covers and drainage systems (EN124)
- Pipeline accessories
- Solar street light systems
- Solar conduit pipe and fittings

### CONSTRUCTION MATERIALS

- Structural materials
- Concrete accessories
- Anchoring systems
- Finishing materials

### MECHANICAL & ELECTRICAL SYSTEMS

- Mechanical piping systems
- Plumbing distribution systems
- Industrial piping material
- Electrical conduit
- Lighting

## GLOBAL SUPPLY NETWORK & QUALITY STANDARDS

OWS coordinates supply through certified manufacturing partnerships across Europe and Asia, with governance and technical oversight anchored in Canada and the UAE. All suppliers are selected based on manufacturing capability, quality certifications, and compliance with international standards. Our supply chain is supported by ISO manufacturing certifications, EN product standards, NSF, ASTM, FM Approved, UL Listed, and LSFOH-compliant product lines.

## WHY WORK WITH OWS

- **P.Eng-led technical validation:** Materials reviewed against your project specification by a licensed Professional Engineer before any order is placed, preventing substitution errors and on-site compliance failures
- **Full compliance documentation:** Mill certificates, test reports, material traceability records, and EN/ISO certificates supplied as standard with every order
- **Manufacturing-backed sourcing:** Direct relationships with certified European and Asian manufacturers, competitive pricing without compromising on certification or traceability
- **Program-aligned delivery:** Supply coordinated to your construction schedule and delivery sequencing requirements, not just your purchase order date
- **North American compliance culture:** Canadian-founded governance structure with rigorous supplier qualification, documentation standards, and quality assurance processes

*We reduce supply chain uncertainty before it impacts your construction timelines.*

## NEXT STEP

If you have an upcoming project requirement or active RFQ where OWS can support, we welcome the opportunity to submit a competitive quotation with full technical and compliance documentation. Please contact us to be added to your supplier list or to request product data sheets for any category above.
